How to use Remote Desktop Connection through eWON?

1 Purpose

This document will show you the configuration to allow the use of "Remote Desktop Connection function" of your PC. Not only the standard Windows feature is explored but also VNC and TeamViewer.

2 Implementation

We suppose the eWON was correctly configured to have its VPN connection to Talk2M and the PC where you want use "Remote Desktop Connection" is connected to the eWON using eCatcher.

6 : Ok

This PC now is ready to allow a remote connection.

2.2 PC remote controller

This pc must have its VPN to the eWON where the remote PC is connected established

Ok now your are connected to the remote PC

3 Other type of remote desktop connections

3.1 VNC

If you want use VNC connection, you must install on both PC, a software like for example :

The procedure in this case is similar to the one using the Windows feature.

3.2 TeamViewer

You can also use the option of "TeamViewer"

But in this case, its a little bit different.

Of course you must install "TeamViewer" on both PC, but you must also allow the remote PC to have an internet access.

To do this see this link : https://ewon.biz/sites/default/files/kb-0069-0-enaccess internet via ewon beside talk2m vpn.pdf
