How to access the Internet via the Cosy (beside Talk2M VPN)

On the COSY, the settings you'll need to change are:

- NatItf = 2 (Nat and TF on WAN)

- VPNRedirect = 0 (Allow traffic outside the VPN tunnel)

- FwrdToWAN = 1 (Forward LAN traffic to WAN)

You can find instructions for changing those settings on our Support website.

You'll need to reboot to apply the changes.

This process turns Plug'n Route off.

You'll need to make sure that all of the Ethernet devices behind the eWON have the eWON's LAN IP address as the default gateway address.
