

eCatcher using a proxy without any authentication

If your Proxy Server doesn't require authentication and, logically, you leave the Proxy username/password empty in eCatcher3, you will have the following ErrorBox message:

```
Cannot connect to Talk2MServer : > FATAL: ERROR: username from HTTP  
Proxy authfile 'C:\xxxx\xxxauth.txt' is empty
```

The workaround is to set a Proxy username and leave the password empty.
