Ethernet interfaces of the eWON

By default, the Ethernet interfaces of eWON are in Auto-negociation mode.

On every connection, the ethernet interface will re-negociate the speed and transmission mode (Half-duplex or full-duplex).

That means there is no risk of Duplex-mismatch with eWON (see [http://en.wikipedia.org/wiki/Full-duplex_Ethernet](http://en.wikipedia.org/wiki/Full-duplex_Ethernet)).
