

Run Basic script when eWON starts up

When you develop a Script in your eWON, you probably wish to have it always running whatever it is happening on site.

However, the Script execution is by default disabled at boot time. To force eWON to start the Script when it starts up, you have to check the Option "Script starts at eWON Boot" (3) in Script Setup (1) \ Script Control (2) and click "Update Autorun Mode" (4).
