

What is the meaning of VPN for the Flexy 10X range?

The Flexy 10X doesn't have any routing capabilities so why is there a VPN?

Using the Flexy 10x Base Unit you can connect the eWON to Talk2M or to any other OpenVPN server.

Through the VPN tunnel you can then reach the eWON Web pages to display for example the ViewIO page. But you cannot route to the serial or the Ethernet devices behind the eWON.

You can also use the VPN tunnel to send data to the server, as for example historical data, etc.
